About

I'm a frontend developer working with TypeScript and React. I have hands-on experience working with modern technologies including React, React Native, Node.js, MongoDB and GraphQL. I actively seek out new technologies and stay up-to-date on industry advancements.

Experience

Frontend Engineer - Wuzzuf March 2021 - Present

Work within a cross functional team, collaborate to solve technical problems

Refactor and improve existing codebase

TypeScript, React, React Native, Redux, Emotion, Storybook, Jest, Node.js, Docker, Webpack

Senior React Developer - Minds For Integrated Solutions March 2020 - February 2021

Work within a cross functional team, collaborate to solve technical problems

Lead mentoring sessions about modern technologies such as Docker and Node.js

TypeScript, React / Next.js, TailwindCSS, React Query, Framer Motion
